Genetic Modification Experiment (Progress/ Completion) Report<sup>1)</sup>

Date of submission: March 31, 2015

To: The Director General, Japan Synchrotron Radiation Research Institute

I apply for the safety control of a genetic recombination experiment as follows.

Description

Receipt number <sup>2)</sup>		04-01	The number can be found in the Notification of Approval.	
Person in charge of the experiment	Name of the organization and department	XX University, Graduate School XX Department XX Laboratory		
	Title	Leave it blank if User is the person in charge of experiment.		
	Name	XXX Sabro		
Manager <sup>3)</sup>	Name	Seal		
Name of experiment worker, place of experiment. Genetically modified organisms used for the experiment. <sup>4)</sup>		Apply using an attachment.		The "Attachment" will be mailed separately from the JASRI Safety Office.
Duration of experiment		April, 20, 2014 - May, 1, 2014		
Frequency of the experiment		<input type="checkbox"/> Almost every day <input type="checkbox"/> Approx. times/week <input checked="" type="checkbox"/> Approx. 3times/month <input type="checkbox"/> Approx. times/year <input type="checkbox"/> Not conducted		
Storage of genetically modified organisms	Experiment in progress	<input type="checkbox"/> Yes <input type="checkbox"/> No		
	Experiment completed <sup>5)</sup>	<input type="checkbox"/> Yes	Submit Form 20-4, Notification of Storage of Genetically Modified Organisms.	
		<input checked="" type="checkbox"/> No	Enter the method of disposal of genetically modified organisms. Return to the organization after sterilization by autoclaving.	
Restoration	Safety cabinet <sup>6)</sup> (for P2, P2A, and P2P level experiment)	( <input type="checkbox"/> At every use or <input type="checkbox"/> Periodically), the worker confirms whether there are not any abnormalities. Enter only for an experiment that requires containment measures on a P2, P2A and P2P level.		
	Other equipment <sup>7)</sup>	The lab bench and lab apparatus that were in contact with genetically modified organisms are always sterilized after the experiment. The centrifuge and blenders are inspected once a month.		
Comments regarding the safety of this experiment <sup>8)</sup>		If anything that should be mentioned regarding the safety of genetically modified organisms and operations is noticed during the experiment, enter it here.		
Future plan		The current experiment will continue in FY 2017.		

Date of Receipt	20YY, MM, DD	Confirmation by Safety Office		Confirmation by Safety Supervisor
